

The image shows a mobile game interface. On the left, there is a character selection screen with a purple border. It features a large portrait of a character with short brown hair and a blue and white outfit. Below the portrait are several smaller portraits of other characters in various costumes. At the bottom of this screen are buttons for "SELECT" and "CREATE". To the right of this is a main game area consisting of a grid of 16 smaller squares. Each square contains a different character or scene, some of which are partially obscured by a semi-transparent overlay. The top right corner of the main area has a pink and yellow gradient. On the far left edge of the screen, there is a vertical bar with the text "SONY Ericsson" and "Sony Ericsson" repeated twice. The overall background is a light grey.

The image consists of two side-by-side screenshots from a mobile application. The left screenshot features a white background with a red border at the top. It displays four character icons arranged horizontally: a red character with a sword, a green character with a shield, a blue character with a staff, and a yellow character with a bow. Below each character is a small, semi-transparent circular portrait of the same character. The right screenshot has a blue header bar with white Korean text. The main body of the screen is filled with a dense, illegible gray text, likely a log or message. At the bottom, there is a blue footer bar containing several white icons: a house-like icon, a circular icon with a dot, a square icon with a dot, and a gear-like icon.
